No 911 Outages	No 911 Outages	No 911 Outages

### 911 Outages/Remote/Community Isolations:

· None reported.

#### **Service Interruptions:**

### 911 Center Service Interruption, Stanislaus County

On 04 /25/18 at 0438 hours, the Stanislaus County OES Duty Officer, advised the California State Warning Center (CSWC) of breaker failure at their 911 dispatch office.

- As a result, they have relocated to their alternate dispatch site in Ceres. All 911 systems, landline and cellular, are operational at the alternate site at this time.
- Technicians are on site at Stanislaus Dispatch at this time and there is no estimated time of repair.
- The relocation is affecting Modesto PD and Modesto County FD Dispatch.
- · Cal OES Duty Officers have been notified, are monitoring and will provide updates as they become available.

# **WEATHER OF CONCERN**

### **Weather of Concern**

• There is no weather of concern.

### Weather Advisories, Watches, and Warnings currently active in California:

### **Active Weather Warnings, Watches and Advisories by County:**

http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1

### **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

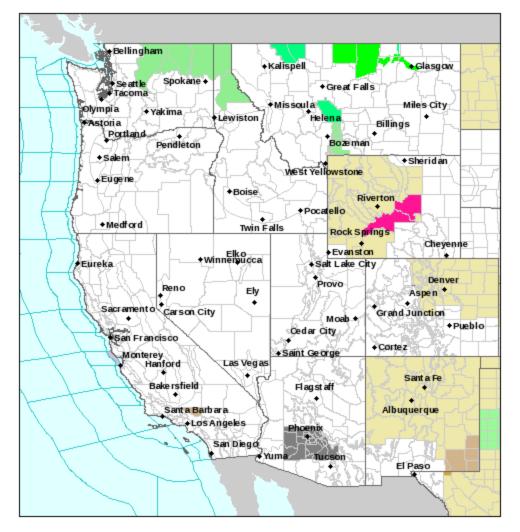

A high pressure ridge will gradually move east today as a Pacific low pressure system approaches the northern CA coast. Southerly winds will increase slightly today. As the low moves closer to the coast and the ridge exits the region tomorrow, conditions will become cooler, more humid, and clouds and southerly winds will increase. Shower and thunderstorm chances will start earlier and cover a larger area. This trend will continue Friday through at least Sunday as the low moves overhead.

#### SOUTHERN CALIFORNIA

There will be very little change in temperature and humidity across the region through tomorrow as a ridge of high pressure remains over the West Coast. Maximum temperatures will be 10-15 degrees above normal away from the coast, with upper 60s and 70s across the mountains and 80s to low 90s in the valleys. Minimum humidity will be mainly in the teens away from the coastal areas. Southeast flow aloft may bring isolated afternoon thunderstorms to the Sierra Crest today and tomorrow. A Pacific trough will approach the West Coast Friday and then push inland and remain over the West Coast Saturday through early next week bringing substantial cooling and an increase in humidity. Westerly winds of 20-30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday through early next week.
